Art Unit: 1742

1. The following is an examiner's statement of reasons for allowance: ***

a) The basis of the rejection over Lawrence, particularly with respect to tin content, is no longer tenable in view of ¶5 of the Second Declaration of Laxmi Tandon. The stated reason for tin in the prior art is to achieve a fine microstructure and a reduced level of free ferrite. While one not concerned with these features could remove the tin from the prior art, as stated by the examiner in the previous Office Action, the inventors in fact desire these features, as indicated in ¶5 of the Second Declaration. It therefore would not be obvious to remove the tin from the prior art as proposed in the rejection.

b) In addition, the Second Declaration presents evidence that the present invention achieves unexpected results in comparison to a representative embodiment of the prior art; see particularly ¶ 8 and 9 of the Second Declaration.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
